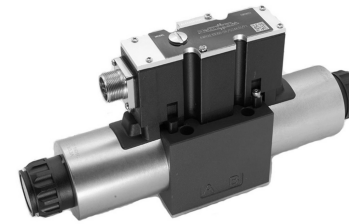
AH-3DREP6(E)...type 3-Way Direct Proportional Operated Reducing Valve



AH-3DREP6 and AH-3DREP6E...type

Size 6
Max. Working Pressure: 100 bar
Max. Flow: 15 L/min

Contents

Features

-Directly controlled proportional valves for the control of the pressure and direction of a flow
-3-Way design and standard ISO 4401-03 mounting
-Operated via proportional solenoids with central thread and removable coil
-Spring centred control spool
-Hand override, optional

Function and configuration

AH-3DREP/3DREPE type 3-way direct reducing valve is directly actuated by proportional solenoids. They convert an electrical input signal into a proportional pressure output signal.

The valve comprises of valve Housing (1) with mounting surface, Control spool (2) with pressure measuring spools (3), Solenoids (4) with control thread and Optional integrated valve electronics (5).

With the solenoids (4) de-energized the control spool (2) is held in its centeres position by compression springs. The control spool (2) is directly actuated when one of the solenoids is energised. The pressure measuring spool (3) and control spool (2) move to the right in proportion to the electrical input signal. The connection from P to B and A to T is via orifice form cross-sections with progressive flow Characteristics – De-energization of the solenoid (4). The control spool (2) is returned to its centre position by the compression springs. In the middle postion the connections A and B to T are open, thus the pressure fluid can freely flow to tank.

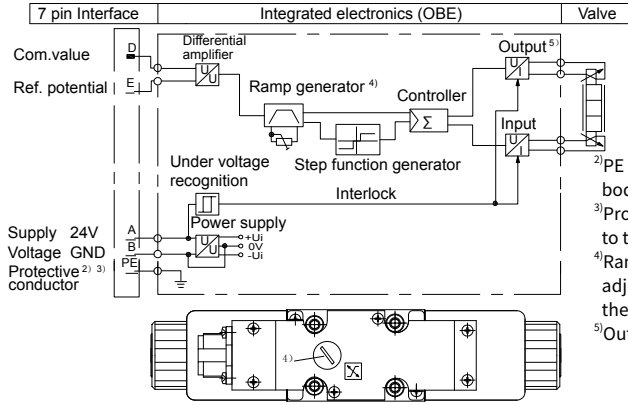
Connection cable:
Recommended:
– up to 25 m cable length type LiYCY 7×0.75 mm²;
– up to 50 m cable length type LiYCY 7×1.0 mm².
For outside diameter see plug-in connector sketch.
Only connect screen to PE on the supply line.

Command value:
Reference potential at E and positive command value (0 to +10V or 12 to 20mA) at D result in pressure in A.
Reference potential at E and positive command value (0 to -10V or 12 to 4mA) at D result in pressure in B.
With valves with 1 solenoid on side b (design A): Reference potential at E and positive command value at D result in pressure in A.
With valves with 1 solenoid on side b (design B): Reference potential at E and positive command value at D result in pressure in B.

· Integrated electronics (OBE) for type AH-3DREPE6



[2] PE is connected to the cooling body and the valve housing!
[3] Protective conductor screwed to the valve housing and cover.
[4] Ramp can be externally adjusted from 0 to 5s, the same applies for T_{up} and T_{down}.
[5] Output stages current regulated.
